Who we are

- An ~~old~~ technology... A mature technology!
- But even more... a flexible technology!

R&I priorities for DHC

To make a long story short...

The R&I priorities for the DHC sector are all the activities allowing DHC sector to be an

Integrated energy networks to couple local supply with various energy demands

With all the linked implications: low temperature network, relation with customers, storage, planning, management, integration of RES, etc.

For more information

DHC is a transversal technology and we can't do it alone!

Be part of the movement!

Thank you for you attention!
